

Ditch the paperwork, keep the details.

Digital on-the-go auditing
with real time reporting.

Healthcare Audits-IQ

Real time reporting to keep everyone involved in the know no matter where you go. Audits-IQ helps to:

- ✓ Prolong the value of your assets (especially your human assets)
- ✓ Keep your personnel safe from accident or injury
- ✓ Spare you from unforeseen downtime

Audits-IQ can handle the hundreds of stages and checkpoints of your healthcare business that need to be cleared. Ditch the hassle of saving, processing, and archiving paper-based checklists. And avoid human error. With our innovative and technology-driven auditing and inspection tool, AuditsIQ, you can meet your challenges in real time with no special expensive equipment – using any smart mobile device to execute digital audits and inspections.

With AuditsIQ, you can create hundreds of inspection templates, eliminate paper forms, capture digital signatures, assign standardized and dynamic checklists with predefined actions, and more. Schedule, assign, and run audits easily – anywhere.

Workplace inspections and audits in the healthcare industry are not just a legal requirement but also a great way of keeping operations smooth. In the regulatory environment that governs today's healthcare industry, there is zero tolerance for lapses in quality control. Real-time, mobile audits are needed at every phase of the healthcare journey. From the calibration of lab equipment to validation of testing procedures to compliance with safety regulations and more, detailed inspections keep your organization trouble free. Accurate, regular audits allow you to prolong the value of your assets, keep your personnel safe from accident or liability, and spare you from any unforeseen downtime. Ensuring that all your healthcare medical facilities, buildings, construction sites, and human resources are well-managed is critical to your mission.

As a healthcare provider, you must meet multiple health, safety, and compliance requirements. As you strive to achieve compliance with standards within multiple facilities, clinics, buildings, and protocols, spreadsheets and old school assessments can't keep up.
